

# ART CLAY<sup>TM</sup> SILVER **Basic Instruction Guide**

## Spiral Ring

### <Material>

Art Clay Silver 650 Syringe 5g	1pc
--------------------------------	-----

Completed piece

### <Step by Step Guide>

1) Draw a guide line of a ring width on a ring size sheet.

2) Wrap the ring size sheet of 4.5 sizes (Japanese size) bigger than an actual size around a wooden mandrel.

3) Extrude about 1cm using 5g of syringe with a green nozzle on the center of the guideline. Then lay the tip of your syringe line on to the mandrel.

4) Keep the tip of the syringe 1cm away from the mandrel as you work, and start to turn the mandrel away from the syringe line as you extrude.

5) Continue to extrude the syringe line inside of the guideline at random in one long syringe line, and dry. (About 15 layers)

6) Take the dried ring and ring size sheet off the mandrel, then take off the ring size sheet carefully and fire.

7) Polish the entire piece with a stainless steel brush, and finish with a burnisher to complete.
