UV resin	1pc
Resin Color Lemon	some
Resin Color Opaque White	some
Pressed flower	some
SV925 Rolo Chain 40cm	1pc
Pressed flower (Example: hydrangea)	

<Step by Step Guide>

- 1) Make a clay rope. Then, place a pair of plastic strips (1.5mm thick) on both sides, and roll out the clay into a plate shape.

- 2) Cut a strip approx. 7mm wide x 7.5mm long with a steel scraper.

- 3) Moisten the clay and make a teardrop shape.

- 4) Open a hole at the top with a straw.

- 5) Dry with a hair dryer.

- 6) File the front and back sides with #320 sandpaper, and smooth the surface with a red sponge sanding pad. Fire.

- 7) Polish with a stainless steel brush, and make a mirror finish with sponge sanding pads (red, blue and green in order). Then, flatten the back with sandpaper (#320, #600).

- 8) Wash the piece well with some neutral detergent, and wipe off with a cloth. Attach the back with some tape.

- 9) Pour UV resin approx. 2mm deep for the first layer. Cure in a UV Light Box for approx. 2min.

10) Mix UV color Opaque White and Lemon and adjust to your favourite color. Then, mix UV resin and UV color.

11) Pour to approx. 2mm deep, then cure in the box for 5mins.

12) Pour UV resin, place the pressed flower, and cure in the box for approx. 2mins.

13) Pour UV resin, and cure in the box for approx. 5mins.

14) Paint some UV resin thinly on the back with a toothpick, cure in the box and finish.

Optional pieces can be made with different shapes, flowers, UV color etc.
