

Panda Pendant

Level: Basic

Completed piece

<Materials>

Art Clay Silver Clay Type	5g
Round jump ring	1pc

Option:

R-168 Acrylic UV Resin (Clear)	A small amount
R-205 Resin color (Black)	A small amount

<TOOLS>

ACS Exclusive Design Plate/Animals

<Step by Step Guide>

1) Put some food oil thinly with a cotton swab on the back of the metal plate so as not to stick together.

2) Put some food oil on the work surface. Make a ball with 5g of the clay, and press down to the round shape (Dia. 2cm and 2mm thick) with your finger or a mini roller.

3) Press the metal plate parts down onto the clay.

4) Press the metal plate outline down onto the clay so as to 3D effect relief.

5) Dry, smooth with a red sponge sanding pad (#320-600). Drill a hole with a ϕ 1.5mm drill bit into the top of the piece. Fire at 800C/1472F for 5 minutes, and polish with a stainless steel brush. Set a round jump ring and a chain, and finish.

OPTION: After polishing, mix a small amount of UV resin and UV color (black), paint on the surface, and cure for 5 minutes in UV light box. Then, finish.
